# ***Mishap Confidence Interval***

- UCI = Upper Confidence Interval      LCI = Lower Confidence Interval
- Rate values above the UCI or below the LCI infer a statistically significant change is probable. This is only an indicator. Significance cannot be determined until end-of-year.\_
- Values between the UCI and LCI infer that nothing significant has occurred to increase or decrease mishap rate.

(Confidence Interval is based on: Poisson Rate related to a Chi Squared Distribution and calculated using FY04-08 data).

## ***FY12 Goal Explanation***

FY12 Goals were calculated to reflect the whole number of events that could occur in a given category and still achieve the 75% reduction from 2002. This calculation takes into account the changing exposure level (i.e. population, flight hours and fleet size) as well as the OSD requirement to only count the property damage events from 2002 that would be Class A events under the new property damage thresholds.
